This Senior Design Project is brought to you for free and open access by the School of Engineering, Technology and Computer Science Design Projects at Opus: Research & Creativity at IPFW. It has been accepted for inclusion in Computer and Electrical Engineering Technology & Information Systems and Technology Senior Design Projects by an authorized administrator of Opus: Research & Creativity at IPFW. For more information, please contact admin@lib.ipfw.edu.

An RFID System for Rental Car Tracking

By

Edivaldo Manuel

ECET 491 Senior Design Project

December 5, 2005

Instructor: Professor Paul Lin

Faculty Project Advisor: Professor Gary Steffen

Table of Contents

	Page
Chapter 1: Introduction	6
1.1 Problem Statement.....	6
1.2 Project Overview.....	6
1.3 Research method.....	7
Chapter 2: Defining Components	8
2.1 Radio Frequency Identification Tags	8
2.1.1 Difference between passive and active RFID tags.....	8
2.1.2 Difference between read-only and read-write tags.....	9
2.1.3 Read range of an RFID tag.....	9
2.1.4 Tag collision.....	9
2.2 Radio Frequency Identification Antenna	9
2.2.1 Frequencies.....	9
2.3 Radio Frequency Identification Reader	11
2.3.1 Reader collision.....	11
2.4 Serial Communication	13
Chapter 3: Similar Technology	14
3.1 Bar Code Technology	14
3.1.1 Bar Code Scanning.....	14
3.1.2 Bar Code Speed and Accuracy.....	15
3.2 Advantages of RFID	15
3.2.1 Advantages of RFID vs. barcode technology.....	15
3.3 Disadvantages of RFID	15
Chapter 4: Theory of Operation	16
Chapter 5: Design, Testing and Simulation	18
5.1 Hardware Design, Testing and Simulation	18
5.1.1 Establishing Communication.....	18
5.2 Software design, Testing and Simulation	19
5.2.1 Database Connection:.....	20
5.2.2 Protocol PC to S2000 Micro-reader.....	24
Chapter 6: Testing and Simulation Results	26
6.1 Programming Read/Write Transponders	26
6.2 Retrieving Data from the Database	30

	Page
Chapter 7: Project Schedule & Budget	31
7.1 Project Planning & Schedule	31
7.1.1 Planning & Schedule (Hardware Design, Testing & Cost).....	31
7.1.2 Project Schedule (Software Design & Testing).....	32
7.2 Budget	32
 Chapter 8: The Future of RFID	 34
 Chapter 9: Conclusion	 35
 Chapter 10: References	 36

List of Figures

	Page
Figure 1: RFID Tag internal circuit.....	8
Figure 2: Passive RFID Tag.....	8
Figure 3: Low-frequency RFID Antenna block diagram.....	10
Figure 4: Low-frequency RFID Antenna.....	10
Figure 5: Low-frequency RFID Reader internal circuit.....	11
Figure 6: Low-frequency RFID Reader.....	12
Figure 7: Bar Code.....	14
Figure 8: RFID Block diagram.....	17
Figure 9: Control Panel.....	20
Figure 10: Administrative Tools.....	21
Figure 11: ODBC Data Source Administrative.....	22
Figure 12: Create New Data Source.....	22
Figure13: ODBC Microsoft Access Setup.....	23
Figure 14: Select Database.....	23
Figure 15: Successful Tag programming.....	27
Figure 16: Successful Tag Reading	28
Figure 17: Tag Displaying Data from Database.....	30
Figure 18: Tag Displaying Data from Database.....	30
Figure 19: Prototype 3G RFID tag.....	34
