This Senior Design Project is brought to you for free and open access by the School of Engineering, Technology and Computer Science Design Projects at Opus: Research & Creativity at IPFW. It has been accepted for inclusion in Computer and Electrical Engineering Technology & Information Systems and Technology Senior Design Projects by an authorized administrator of Opus: Research & Creativity at IPFW. For more information, please contact admin@lib.ipfw.edu.

SENIOR DESIGN PROJECT
OF AN
ACTIVE CROSSOVER NETWORK
TO BE USED BY
SPECTRUM LIGHT AND SOUND

Prepared for

Professor Harry Gates
Electrical Engineering Technology Department
Indiana Purdue University at Fort Wayne

ABSTRACT
of
SENIOR DESIGN
PROJECT OF AN
ACTIVE CROSSOVER NETWORK
FOR
SPECTRUM LIGHT & SOUND

The system described will divide the audio spectrum for individual drivers before amplification. In using an active crossover, bands and sound systems can multi-amp their audio systems. In multi-amping the system will have clearer, tighter sound with reduced distortion.
