Abstract

The Connolly's Do It Best Rental Reservation System is a reservation application that was specifically written for Connolly's Do It Best. Each of the four franchised stores would be able to maintain their own rental reservation system as they would not be linked together. This application is meant to be run on another personal computer or Kiosk that customers are able to interact with. It allows customers to be able to view rental items and information and able to create their own reservations. There are many administrative tools that the employees have access to that include using CRUD on databases for customers, employees, reservations, and rental items.

Keywords: Connolly's Do It Best, Kiosk, CRUD, Database, Personal Computer, Application, Rental
