ABSTRACT

Many people around the world are in their cars all day, making their living that way. I believe that Mileage Buddy was application that I wanted to pursue because my father is a salesman and he is constantly writing down miles to keep for business purposes. Why not create an application that digitally stores all of that data for you in an easy-to-use interface. There are many features that you could implement into an application like this but I want to focus on just the main points.

- Navigation
- Directions
- Driving Miles
- Driving Time
