## **A Typology and Comparison of Triangular Projectile Points from Central Indiana**

Scott Hipskind

Robert McCollough

Anthropology Department

Indiana University-Purdue University Fort Wayne

This study looks at Triangular projectile points from four different Late Prehistoric sites in central Indiana. Using Railey's (1992) typology system, the triangular points from Heaton Farm site in Greene County, Clampitt site in Lawrence County, and Castor Farm and Strawtown enclosure sites in Hamilton County were categorized and compared. The basal widths of the points from Heaton Farm, Castor Farm and Strawtown enclosure were also compared with the results of the Bradbury and Richmond 2004 study. This study gives a comprehensive look at how triangular projectile points from Late Prehistoric sites in central Indiana change spatially and temporally.
