Agriculture and the Macro Economy

Blake P. Fuelling

Nodir Adilov

Department of Economics/ E322 Intermediate Macroeconomics

Indiana University-Purdue University Fort Wayne

Agriculture plays a very important role in economy of the United States it provides food and jobs both domestically and internationally as well. This paper discusses how changes in exchange rates and monetary policy have an affect on agriculture in the United States. Additionally, this paper also takes a look at how agriculture has changed over the years and how this has affected GDP and employment in the United States.
