Abstract

This report covers the progress I have made in my senior design project “A Microcontroller-Based Terrarium Climate Control / Monitoring System”.

Through the use of the skills I have developed and the knowledge I have gained during my time at IPFW, research conducted during the progress of this project, and the help and advice of my faculty advisors, friends, and fellow students I have fully met most of the goals of this project and partially met all others. This report is a summary of how these goals were met.

Table of Contents

List of Figures/Tables.....	4
Introduction.....	5
System Overview.....	6
Detailed System Operation.....	8
Proposed Goals.....	13
Results.....	14
Cost.....	21
Conclusion.....	22
Bibliography.....	23
Appendix 1: C Source File.....	24

List of Figures/Tables

System Overview Block Diagram.....	7
Feedback Loop.....	11
State Table.....	12
Requirements Definition Table.....	13
Gantt Chart.....	20
